Response to Office Action mailed 07/12/2005

Application No. 10/623,447

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A computer implemented method for facilitating wireless browser independent the downloading of an application from at least one server computer to a client device, the method comprising steps of:

receiving from said client device an initiation request for information describing available applications;

responsive to said initiation request, retrieving for each available application information describing said respective application and a link to an application descriptor for said respective application; and

transmitting said application information and said link to said client device.

2. (Currently amended) The computer implemented method of Claim 1, further comprising steps of:

receiving from said client device a request for an application descriptor, said request comprising a link to said application descriptor; and

transmitting said application descriptor to said client device.

3. (Currently amended) The computer implemented method of Claim 1, further comprising steps of:

receiving from said client device a request for an application descriptor;

transmitting said application descriptor to said client device;

receiving from said client device a request to download a selected application;

retrieving said selected application; and

transmitting said selected application to said client device.

4. (Currently amended) The computer implemented method of Claim 1, wherein said client device is one of a computer, a handheld device, a personal digital assistant (PDA), and a wireless mobile telephone.

Application No. 10/623,447

5. (Currently amended) The computer implemented method of Claim 1, wherein said at least one server computer comprises at least one of a network server and an application server.

6. (Currently amended) The computer implemented method of Claim 1, wherein said at least one server computer comprises at least one application server coupled to said client device via at least one network server.

7. (Currently amended) The computer implemented method of Claim 1, wherein said link is one of a URL and a URI.

8. (Currently amended) A computer implemented method for facilitating wireless browser independent the downloading of an application from ~~at least one~~ an application server computer to a client device through a network server computer, the method comprising steps of:

receiving ~~from a user at the client device~~ a request for information describing available applications from a user; and

~~generating to said at least one server computer by a client device~~ an initiation request for information describing available applications and for a link to an application descriptor corresponding to each respective available application.

9. (Currently amended) The computer implemented method of Claim 8, further comprising steps of:

receiving from said ~~at least one~~ application server computer through said network server computer said application choices and corresponding links;

storing said links in a memory of said client device;

displaying said application choices;

receiving from said user a selection from said application choices for an application;

recalling the link for the selected application;

reaching said link on said ~~at least one~~ application server computer through said network server computer;

receiving at said client device an application descriptor for the selected application;

Response dated 11/14/2005
Response to Office Action mailed 07/12/2005

Application No. 10/621,447

generating to said application at least one server computer through said network server computer, via a content/application download model (CADM), a request to download said selected application; and
receiving and displaying at said client device said selected application.

10. (Currently amended) The computer implemented method of Claim 8, further comprising the steps of:

determining from said application descriptor whether said a selected application is suitable for downloading to said client device; and

upon a determination that said selected application is suitable for downloading to said client device, ~~for performing said step of performing~~ downloading said selected application.

11. (Currently amended) The computer implemented method of Claim 8, wherein said client device is one of a computer, a handheld device, a personal digital assistant (PDA), and a wireless mobile telephone.

12. (Currently amended) The computer implemented method of Claim 8, wherein said link is one of a URL and a URI.

Claims (13-14) Cancelled

15. (Currently amended) The computer implemented method of Claim [8]9, wherein said content/application download model (CADM) is one of Java-AMS, BREW, and CoD.

16. (Currently amended) A system for facilitating wireless browser independent the downloading of an application from at least one server computer to a client device, the system comprising:

at least one server computer having a processor adapted for executing program code;

a client device having a processor adapted for executing program code;

a wide area network interconnecting said at least one server computer and said client device;

Application No. 10/624,447

Response to Office Action mailed 07/12/2005

program code executable by said client device for receiving from a user a request for information describing available applications; and

program code executable by said client device for generating to said at least one server computer an initiation request for information describing available application; and for a link to an application descriptor corresponding to each respective available application;

program code executable by said at least one server computer for receiving said initiation request for information describing available applications; and

program code executable by said at least one server computer, in response to receipt of said initiation request, for retrieving for each available application information describing the respective application and a link to an application descriptor for each respective application.

17. (Original) The system of Claim 16, further comprising:

program code executable by said client device for receiving from said at least one server computer said application choices and corresponding links;

program code executable by said client device for storing said links in a memory;

program code executable by said at least one server computer for receiving a request for an application descriptor, said request comprising a link for said application descriptor; and

program code executable by said at least one server computer for transmitting said application descriptor to said client device.

18. (Original) The system of Claim 16, wherein said client device is one of a computer, a handheld device, a personal digital assistant (PDA), and a wireless mobile telephone.

19. (Original) The system of Claim 16, wherein said at least one server computer comprises at least one of a network server and an application server.

20. (Original) The system of Claim 16, wherein said at least one server computer comprises at least one application server coupled to said client device via at least one network server.

21. (Original) The system of Claim 16, wherein said link is one of a URL and a URI.
